DEVELOPMENT

GROWING TOGETHER... RESPONSIBLY

ESG REPORT
2024-25

At KSH INFRA, “Inspiring Green Development” is more than a guiding phrase: it shapes how we envision, design, and build every industrial and logistics asset.

Our theme, **Growing Together...Responsibly**, captures a simple truth: growth holds meaning only when it benefits everyone connected to us and respects the environment that sustains us.

We view progress as a shared journey. Responsible growth, for us, means creating infrastructure that enables business expansion while restoring natural systems, strengthening communities, and setting higher benchmarks for sustainable logistics in India.

Our IGBC-certified parks reflect this philosophy, crafted with high-performance materials, efficient resource systems, and climate-responsive designs that enhance comfort, safety, and long-term value.

For our clients, this means resilient, efficient spaces designed to support continuity and future readiness.

For our investors, it represents assets built with foresight, aligned with evolving regulations, resilient to climate risks, and focused on long-term value creation.

For our employees, it creates safe, purposeful workplaces where their work contributes to tangible, sustainable impact.

For our supply chain partners, it underscores our commitment to transparency, ethical collaboration, and environmentally responsible practices.

For our communities, it ensures development that supports inclusion, well-being, and a healthier local environment.

With each new project, we move closer to a future where logistics infrastructure is energy-efficient, digitally connected, water-secure, socially responsive, and prepared for global supply chain demands. Our path is clear: to build every park stronger, smarter, and more responsible than the one before.

GROWING TOGETHER... RESPONSIBLY

is more than our theme, it is our promise of progress with accountability, care, and shared purpose!

OUR ESG VISION

To create a world where businesses prioritize sustainability, equity, ethical governance, and where stakeholders thrive together.

ABOUT THE REPORT

This Sustainability Report represents KSH INFRA's second sustainability disclosure and reflects our continued commitment to responsible growth and transparent ESG reporting. The report outlines how sustainability is integrated into our business model, decision-making processes and day-to-day operations as we develop and manage modern industrial infrastructure.

This edition presents our ESG approach, key achievements and priority focus areas, supported by quantitative and qualitative disclosures. It highlights our environmental, social and governance performance and reflects continuous engagement with stakeholders to understand expectations, manage impacts and strengthen long-term value creation.

FRAMEWORK

This report has been prepared with reference to the Global Reporting Initiative (GRI) Standards, which provide a globally recognised framework for sustainability reporting. The GRI Standards guide the structure, content and metrics disclosed in this report, enabling transparency, consistency and comparability of ESG information.

The content of this report has been determined based on a materiality assessment, identifying ESG topics that reflect KSH INFRA's most significant impacts, risks and stakeholder priorities.

Given KSH INFRA's "buy-build-lease-exit business model" certain disclosures have been adapted to reflect the nature of our operations and project lifecycle, while remaining aligned with the intent and principles of the GRI Standards.

REPORTING PERIOD

This report captures our ESG initiatives and performance between April 01, 2024 and March 31, 2025 (in line with the reporting period of our financial performance).

REPORTING BOUNDARIES METHODOLOGY

In line with GRI 2: General Disclosures, this report covers the ESG performance of KSH INFRA's controlled operations, consolidated based on operational control.

Data has been compiled using internal management systems, project documentation, functional records and stakeholder inputs. Where applicable, estimates have been used based on reasonable assumptions and established methodologies. The Brand continues to strengthen data collection and monitoring systems to improve the accuracy, consistency and completeness of future disclosures.

There have been no material restatements of previously disclosed ESG information in this report.

This Sustainability Report has not been externally assured.

FORWARD-LOOKING STATEMENTS

This report include forward-looking statements related to sustainability goals, initiatives and future plans. These statements are based on current expectations and assumptions and are subject to risks and uncertainties that may cause actual outcomes to differ.

CONTACT

For queries, feedback or further information related to this report, stakeholders may contact the KSH INFRA ESG team through official corporate communication channels.

COMPANY OVERVIEW

Founded in 2012, KSH INFRA has evolved into a trusted developer of Grade A Industrial & Logistics infrastructure, known for creating high-quality, compliant, efficient, and future-ready spaces across India's prime manufacturing and warehousing growth centres.

Over the past decade, the company has built a strong reputation for precision-led execution, timely delivery, and long-term asset performance. We have partnered with global PE players such as Morgan Stanley, Mapletree, & Indospace to deliver core assets that are in line with international standards.

Our commitment to excellence has been acknowledged through prestigious industry honours, including:

1. Excellence in Sustainable Industrial Infrastructure: ET Business Awards 2024

2. Excellence in Industrial Real Estate: Times Realty Icons Maharashtra 2024

CLIENTS

Clients are paramount to us, as their satisfaction and trust drive our commitment to providing sustainable infrastructure solutions. By understanding their needs and priorities, we deliver projects that not only meet but exceed expectations, ensuring long-term value and environmental stewardship.

A diverse mix of MNCs from across verticals such as Automobile, Automobile Ancillaries, Paper, Energy, Logistics, FMCG & many more have established their base at our facilities.

EXPANDING FOOTPRINT AND SCALABLE GROWTH

Operates a growing portfolio of 4 Industrial & Logistics Parks

Manages 4+ Mn. sq. ft. of fully operational facilities

Expanding pan-India presence with strategic new developments

Hosur (near Bengaluru) : 1.3 Mn. sq. ft. under development

Sriperumbudur (Chennai) : 1.6 Mn. sq. ft. under development

Driven by a robust pipeline and structured roadmap, targeting 10 Mn. sq. ft. by 2030

CLIENTELE DETAILS

OUR REACH

AN EVOLVING PORTFOLIO

KSH INFRA is strategically expanding its footprint across key locations in India, driving transformation in the industrial and logistics landscape. Through the development of state-of-the-art Grade A infrastructure, we are not only addressing the evolving needs of these sectors but also redefining industry standards in quality, efficiency, and sustainability.

OUR MISSION

Our mission is to become the preferred industrial real-estate partner to the Manufacturing, Logistics, E-commerce sectors, attracting institutional capital by demonstrating excellence in corporate governance and providing them superior risk adjusted returns.

OUR VISION

Our vision is to create highly functional, transformative, carbon-neutral, and sustainable Industrial and Logistics Park solutions across key markets in India.

OUR VALUES

The philosophy of sustained improvement is at the heart of our offering. KSH INFRA works closely with vital industry bodies to deploy best-in-class strategies without compromising on an accountable, qualified, and committed workforce.

Our goal is to create Industrial & Logistics Parks that echo those very values. Operational excellence underscores every thought and action at KSH INFRA, and there's an unrelenting focus on building enduring, synergistic relationships with our clients.

With a focus on long-term value creation, client-centric development, and sustainability-led growth, KSH INFRA is shaping the next generation of Industrial and Logistics Infrastructure building assets that are resilient, state-of-the art, and aligned with **India's transition toward** a greener and more efficient industrial economy.

CORE BUSINESS AREAS

We deliver a comprehensive suite of services across the infrastructure lifecycle, including:

- 1 **Land Sourcing & Acquisition:** Strategic identification and procurement of high-potential land parcels across India.
- 2 **Park Development & Construction Management:** Master planning, design, engineering, and construction of large-scale Industrial & Logistics Parks aligned with global standards. Rigorous project governance ensuring quality, safety, cost control, and adherence to timelines.
- 3 **Built-to-Suit Solutions:** Tailored development based on client-specific operational and compliance requirements.
- 4 **Leasing & Asset Management:** Offering Grade A ready spaces supported by long-term leases, operational oversight, facility optimisation, and compliance management.
- 5 **Sustainable Infrastructure Design:** Integrating certified green building standards (IGBC) optimized energy performance, proactive water management, and sustainability/ESG led planning across all projects.

MESSAGE FROM OUR LEADERS

This year marks a significant milestone in our journey. We have not only continued to expand and innovate in our services but have also made remarkable strides in our Environmental, Social, and Governance (ESG) initiatives. Our vision of creating highly functional, transformative, carbon-neutral, and sustainable Industrial & Logistics Park solutions in India guides every decision and action of ours.

In the environmental domain, we have conscientiously worked towards reducing our carbon footprint, embracing energy-efficient practices, and contributing to a greener planet.

On the social front, our focus has been on enhancing the well-being of our workforce, nurturing community relations, and upholding the highest standards of ethics and integrity.

Our governance initiatives reflect our unwavering commitment to transparency and accountability. We have strived to ensure that every process, policy, and practice aligns with our core values and adheres to the highest standards of corporate governance.

This report is a testament to our dedication and the collective efforts of our team, partners, and stakeholders. The path to sustainability is an ongoing journey, and we are committed to continuous improvement and innovation.

We thank you for your trust and support and look forward to your continued partnership as we shape a sustainable, equitable, and prosperous future.

ROHIT HEGDE

Managing Director

Dear Stakeholders,

As we navigate through an era of unprecedented challenges and opportunities, KSH INFRA, under the stewardship of Waterloo Motors Pvt. Ltd. (our Hold CO.), stands at the forefront of integrating sustainable practices into the core of our business operations.

Our journey towards sustainability is not just a corporate mandate; it is a commitment we embrace wholeheartedly at every level of our organization.

MESSAGE FROM OUR LEADERS

investment in a 50-acre Industrial & Logistics Park in Hosur, Bengaluru marking our strategic entry into larger Bangalore micro-market. Our expansion is focused on markets with strong industrial fundamentals, particularly across southern India and Maharashtra, where demand for high-quality, future-ready infrastructure continues to grow. While scale is important, our emphasis remains on delivering parks that are efficient, safe, and designed to meet global operational standards.

Sustainability continues to guide how we grow. Our philosophy of Inspiring Green Development is embedded in decision-making across land acquisition planning, design, construction, and operations. We remain committed to Green Building Certified developments, responsible resource management, and the integration of technology to enhance operational efficiency and environmental performance. ESG is not treated as a parallel agenda it is integral to how we create long-term value.

Looking ahead, our ESG priorities are clear. Environmentally, we will continue to strengthen energy efficiency, water stewardship, and climate-responsive design across our developments. Socially, we aim to deepen our people-first approach by prioritising safety, skill development, inclusion, and meaningful engagement with communities around our parks. From a governance perspective, we remain focused on transparency, robust risk management, ethical business practices, and active stakeholder engagement as we further scale our operations.

As we look to the future, we are excited about the possibilities that lie ahead. Together, we are committed to creating a legacy of sustainability and innovation, ensuring that KSH INFRA contributes positively to our planet and society in all our endeavours.

SUNDARESAN VAIDYANATHAN

CEO

Dear Stakeholders,

At KSH INFRA, our ambition has always been clear-to build Industrial and Logistics Infrastructure that is relevant for today and resilient for the future. As India's Industrial and Logistics real estate sector enters a phase of accelerated growth, we see a responsibility to ensure that expansion is purposeful, sustainable, and aligned with the evolving needs of businesses, communities, and the environment. This outlook is reflected in our theme for the year, Growing Together... Responsibly.

Over the past year, KSH INFRA has taken meaningful steps in its growth journey, including an INR 450 crore

OUR PARTNERSHIPS AND ACHIEVEMENTS

KSH INFRA has successfully constructed 4 Mn. sq. ft. of green infrastructure parks for major multinational companies, such as Hindalco, Mahindra, Kawasaki Motors, Jabil, Faurecia, Gedia, Rieter, Linamar, Saleri, Kimberly Clark, and others.

After having successfully partnered with prominent global private equity investors such as Pacific Century Group, Morgan Stanley Real Estate Investing, and Mapletree Investments in the past, KSH INFRA continues to work on a Joint Venture with IndoSpace. We have recently formed a Joint Venture with WSB to develop the Hosur project.

Since inception, WSB has committed substantial capital to Indian real estate. Their track record includes more than 70 transactions across six major metropolitan markets in India, managing over 100 projects including mixed-asset, residential, commercial, and now industrial / logistics developments.

Based in Singapore, Mapletree excels in global real estate development, investment, capital, and property management, emphasizing sustainability. Committed to stakeholder value, it integrates development, investment, and management roles, consistently yielding high returns and acclaim for its diverse, award-winning real estate projects.

Established in 2007, IndoSpace is India's leading Industrial Logistics real estate investor, developer, and manager. Committed to quality services, sustainability, and governance, they innovate and deliver top-tier solutions, earning the trust of over 140 MNCs and industry leaders with the development of 58 Mn. sq. ft..

Morgan Stanley provides diverse, specialized global client solutions, leveraging its vast resources for long-term investment performance. Their independent teams offer a broad spectrum of strategies and styles, dedicated to delivering portfolio solutions aligned with specific environmental, social, and governance (ESG) objectives.

RECOGNITION

At KSH INFRA, our focus is on fostering a sustainable future through carefully controlled initiatives. Each project is designed and developed bearing Green Building norms in mind, supported by IGBC Certifications. Our aim is to create top-quality, efficient, and sustainable Industrial & Logistics Parks. As India evolves as a global superpower, it's crucial for industries to prioritize responsible infrastructure for future generations, and KSH INFRA is committed to contributing to this cause.

ECONOMIC PERFORMANCE

Fy25 was a year of disciplined growth and strategic consolidation for KSH INFRA. As India's demand for high-quality Industrial and Logistics Infrastructure continued to accelerate, we focused on strengthening the fundamentals that ensure long-term value creation for our customers, investors, and communities.

Our economic progress this year has been driven by prudent capital allocation, operational efficiency, and a clear commitment to delivering Grade A warehousing solutions. While expanding our footprint across key logistics corridors, we continued to optimise existing assets through upgrades in design, safety, and sustainability ensuring that every park remains future-ready and competitive.

With over 4 Mn. sq. ft. of operational assets and a well-defined roadmap to reach 10 Mn. sq. ft. in the next five years, our development strategy balances growth with financial resilience.

Efficient construction practices, and ESG-driven design innovations have enabled us to manage costs effectively while improving lifecycle performance of our facilities.

FY 24-25	INR (Mn)	USD (Mn)
ECONOMIC VALUE GENERATED	679.43	8.03
ECONOMIC VALUE DISTRIBUTED	667.12	7.89
ECONOMIC VALUE RETAINED	12.31	0.15

NOTE: EXCHANGE RATE CONSIDERED AS ON 31ST MARCH 25 - 84.56 INR/ USD.

A strong customer-centric approach has also contributed to steady economic stability. By deepening engagement with clients across e-commerce, 3PL, automotive, and manufacturing sectors, we have been able to meet expansion needs with speed and reliability supporting new business opportunities and long-term occupancy confidence.

Through this balanced approach, KSH INFRA continues to build a resilient, future-focused portfolio anchored in quality, integrity, and responsible growth. Our economic performance this year reflects a clear vision: to create infrastructure that is financially strong, environmentally sound, and aligned with India's transition to a greener industrial economy.

COMMITMENT AND ACTION IN OUR ESG JOURNEY

OUR ESG OBJECTIVES

As sustainability becomes integral to the way businesses operate, KSH INFRA continues to strengthen its commitment to environmental, social, and governance excellence. Our ESG approach is deeply embedded in how we acquire land, plan, build, and manage our assets, guiding everyday decisions across the organisation. By aligning innovation with responsibility, we focus on creating long-term value for our stakeholders while contributing meaningfully to a resilient and sustainable future.

COMMITMENT AND ACTION IN OUR ESG JOURNEY

ESG ACTION – PROGRESS SNAPSHOT

AREA	FOCUS AREA	GOAL	TARGET	STATUS
Climate and Environmental Action	Green Building Certification	Integrate sustainable design across all developments	Ensure 100% of new projects achieve a recognised green building certification based on project context.	On track
	Water Management	Reduce freshwater dependency through reuse	Achieve 100% reuse of treated wastewater across all operational assets	Achieved
	Energy Efficiency	Improve energy performance through efficient lighting	100% LED lighting across all assets	Achieved
	GHG Emissions	Establish and manage carbon footprint	Conduct Scope 1, 2 and relevant Scope 3 baseline assessment and define reduction targets by FY 2027	Planned
	Renewable Energy	Increase adoption of clean energy	Source 100% of common area power from solar energy by FY 2027	Planned
People, Safety and Community Action	Workforce Diversity	Strengthen gender diversity across workforce	Maintain ≥ 20% women representation	Achieved
	Community Impact	Support local economic development	Increase local employment and contractor participation (to be measured against baseline)	On track
	Health & Safety	Improve workplace safety performance	Achieve ≥ 10% year-on-year reduction in Total Recordable Injury Rate (TRIR)	On track
	Employee Engagement & Internal Satisfaction	Strengthen employee engagement and feedback systems	Implement annual employee engagement survey through an independent agency from FY 2026	Planned
Governance and Accountability Action	Ethical Conduct	Strengthen ethical culture and compliance	Ensure 100% employees trained on Code of Conduct and ethics policies annually	Achieved
	Employee Training & Development	Enhance employee capability	Maintain average training hours ≥ 20 hours per employee annually	Achieved

RISK MANAGEMENT: BUSINESS RESILIENCE

Strong risk management enables sustainable growth. By integrating financial discipline with ESG considerations, we ensure our assets remain resilient, compliant, and future-ready.

Abhijit Pawar
Chief Financial Officer

At KSH INFRA, we define risks as events that could potentially impact our ability to continuously create value for stakeholders. In order to execute our strategy effectively, we respond swiftly to both opportunities and associated risks, while safeguarding the interests of stakeholders. Effective risk management allows us to anticipate and respond to changes in our operating environment and make informed decisions amidst uncertainties.

Based on workshops conducted with key stakeholders, KSH INFRA has identified key risks and opportunities pertinent to its business. These risks and opportunities have been considered for identifying mitigation strategies and ESG goals that must be integrated with business strategies and goals. The ESG Committee has the responsibility of governance oversight to monitor and review strategic initiatives that will address the opportunities and risks identified.

RISK MANAGEMENT FRAMEWORK

KEY RISKS AND MITIGATION STRATEGIES

Harnessing our collective insights through stakeholder management we have identified risks core to material topics across our business strategy and operations. These risks and their mitigation strategies are broadly grouped as below :

ENVIRONMENTAL RISKS

Risks: Environmental risks include extreme weather events, climate-related disruptions, pressure on energy and water resources, industrial waste generation, and potential impacts on natural ecosystems arising from construction activities. These risks may affect operational continuity, regulatory compliance and long-term asset performance.

Mitigation Strategies: Environmental risks are addressed through site due diligence, sustainable design integration, energy- and water-efficient infrastructure, responsible construction practices and biodiversity-sensitive landscaping. Strong partnerships with contractors and suppliers support compliance with environmental standards, while continuous monitoring helps enhance resilience and reduce environmental footprint across projects.

OPERATIONAL AND PROJECT RISKS

Risks: Changes in regulatory frameworks (e.g., Environmental Clearance laws or pollution control requirements) may cause project delays and negatively impact projected returns. Solar Power installations may not yield anticipated financial benefits based on fluctuation in applicability of proposed incentives.

Mitigation Strategies: Risks are mitigated through early-stage regulatory engagement, proactive planning and adaptive design strategies. All suppliers are required to meet our Code of Conduct, ensuring alignment with our standards on safety and responsible operations. Community consultations and benefit-sharing initiatives, such as local employment opportunities, improve community alignment.

ECONOMIC RISKS

Risks: Economic risks arise from fluctuations in tariffs, inflationary pressures, rising input costs, land acquisition constraints, contractual disputes, and changes in macroeconomic policies that could impact project viability. Variability in policy incentives, including renewable energy regulations etc could also have an adverse impact on our bottom line.

Mitigation Strategies: KSH INFRA mitigates economic risks through Robust financial planning & audits which guides us into diversified sourcing strategies, prudent land acquisition planning, phased project development and ongoing cost optimisation. Regular market assessments enable timely response to changing economic conditions. Where renewable energy incentives are uncertain, alternative procurement models such as power purchase agreements are explored to ensure energy security and cost stability.

STRATEGIC AND REPUTATIONAL RISKS

Risks: Strategic and reputational risks include unmet investor expectations, unethical practices, non-compliance with sustainability commitments, and failure to achieve green building certifications, which could impact stakeholder trust and brand value.

Mitigation Strategies: These risks are addressed through transparent governance, strong internal systems, adherence to ethical standards and alignment with recognised sustainability certifications such as IGBC. Clear communication with investors and stakeholders, supported by a robust Code of Conduct, and Policies helps safeguard organisational reputation.

SOCIAL RISKS

Risks: Social risks include workplace safety incidents, inequitable employment practices, community disturbances arising from construction activities, and potential social tensions affecting project acceptance and workforce well-being.

Mitigation Strategies: Ensuring wage and hiring parity across gender diversity, respect for local community traditions, compliance to Health and Safety standards remain priority areas to address through robust HR policies developed and implemented within the organization – resulting in safer and healthier work spaces for our talent and community.

GOVERNANCE, COMPLIANCE RISKS AND DATA PROTECTION

Governance risks are mitigated through defined policies, periodic compliance reviews, internal controls and oversight by senior management and the Board. Strengthened data protection measures and cybersecurity protocols support responsible information management.

OPPORTUNITIES

Develop Sustainable 'Plug and Play' Parks – Access benefits from significant funds allocated by the government to offer ready-to-use infrastructure for rapid operational setup of businesses who seek sustainable supply chain infrastructure.

01 OPERATIONALIZE NATIONAL VISION FOR MULTI MODAL LOGISTICS PARKS

Align with major national Industrial Corridors aimed at Smart Industrial Cities and high capacity transport networks, optimizing logistics cost and time-to-market.

02 INTERFACE WITH NATIONAL DIGITAL PLATFORMS

Integrate business strategy and investor needs for optimal site selection with real-time GIS-enabled data on mapped industrial parks and land availability.

03 EMPLOYER OF CHOICE FOR CONSCIOUS EMPLOYEES

Attracting top talent across generational and gender diversity who seek environmentally conscious workplaces.

04 EXPANSION IN TIER 2 AND 3 CITIES

Leverage decentralized policies and models that encourage industrial growth beyond metro cities to alternate investment hubs.

05 EMPLOYMENT AND SKILLS DEVELOPMENT

Working closely with the community stakeholders to improve their livelihoods and ability to access better and more inclusive quality of life.

MATERIALITY ASSESSMENT

At the genesis of our ESG journey, we engaged with a diverse group of stakeholders to identify and prioritize the material aspects of our sustainability and governance efforts. This process of materiality assessment is crucial to our ESG strategy as it ensures that we focus our efforts where they matter most to our stakeholders and our business.

KEY HIGHLIGHTS

01 STAKEHOLDER INCLUSIVITY

Our workshop brought together voices from across the spectrum of stakeholders.

02 PRIORITIZATION OF ISSUES

Through open discussions & structured engagement, we identified key ESG issues.

03 ALIGNMENT WITH BUSINESS GOALS

The material ESG issues were aligned with our strategic business objectives, ensuring that our ESG efforts drive both sustainable development and business success.

04 COMMITMENT TO ACTION

We have committed to actionable goals and transparent reporting on these material issues, integrating them into our operational and strategic decision-making process.

OUTCOME OF THE MATERIALITY ASSESSMENT

CUSTOMIZED ESG STRATEGY: The insights from exercise have led to a tailored-made ESG strategy that addresses the unique challenges and opportunities.

TRANSPARENT REPORTING: Material ESG issues will be the focus of our reporting, ensuring that our stakeholders are informed about the progress and challenges.

CONTINUOUS ENGAGEMENT: We are committed to ongoing stakeholder engagement to ensure our ESG strategy remains relevant and responsive.

MATERIAL ISSUES	OUR APPROACH	KEY PERFORMANCE INDICATORS (KPIs)	ALIGNED UN SDGs
Energy Efficiency	We optimise operational performance and reduce long-term energy intensity through passive design, efficient equipment, technology-enabled monitoring and integration of renewable energy.	✓ Energy Intensity (GJ/sq.ft.) ✓ Share of Renewable Energy (%) ✓ GHG Emissions Reduction (%)	7 AFFORDABLE AND CLEAN ENERGY 9 INDUSTRY, INNOVATION AND INFRASTRUCTURE 12 RESPONSIBLE CONSUMPTION AND PRODUCTION 13 CLIMATE ACTION
Site Selection	Site selection is guided by connectivity, environmental sensitivity and long-term viability. We assess location-specific risks and opportunities to support resilient operations and responsible land use.	✓ Connectivity and Strategic Access Score ✓ Land Suitability and Infrastructure Readiness Index	9 INDUSTRY, INNOVATION AND INFRASTRUCTURE 11 SUSTAINABLE CITIES AND COMMUNITIES 13 CLIMATE ACTION 15 LIFE ON LAND
Water Efficiency	Water stewardship is embedded into project planning through efficient usage, reuse-oriented systems and site-sensitive design, ensuring long-term water security while minimising stress on local resources.	✓ Water Intensity (KL/sq.ft.) ✓ Recycling and Reuse (%) ✓ Volume of Rainwater Harvested (KL)	6 CLEAN WATER AND SANITATION 9 INDUSTRY, INNOVATION AND INFRASTRUCTURE 12 RESPONSIBLE CONSUMPTION AND PRODUCTION 13 CLIMATE ACTION
Waste Management	Structured waste management practices are implemented across construction and operations, with a focus on segregation, safe handling and authorised disposal to minimise landfill dependency and improve material efficiency.	✓ Waste Intensity (MT/sq.ft.) ✓ Recycling & Reuse (%) ✓ Waste Segregation Efficiency (%)	3 GOOD HEALTH AND WELL-BEING 6 CLEAN WATER AND SANITATION 12 RESPONSIBLE CONSUMPTION AND PRODUCTION 13 CLIMATE ACTION

MATERIAL ISSUES	OUR APPROACH	KPIs	ALIGNED UN SDGs
Sustainable Building Certification	We adopt recognised green building frameworks to guide performance-led design and construction, ensuring measurable environmental outcomes across projects.	✓ % of total built-up area certified	   
Employment, Engagement and Wellbeing	We strive to create safe, inclusive and empowering workplaces that support continuous learning, career growth and employee well-being.	✓ Local Employment Ratio ✓ Employee Engagement Score	  
Community Impact	We engage proactively with local communities to foster social well-being, inclusivity and shared growth through responsible development and outreach initiatives.	✓ % of contractors and vendors sourced locally ✓ Number of community welfare initiatives conducted annually	 
Health and Safety	Health and safety are treated as non-negotiable priorities across construction and operations. We implement structured systems, training and oversight to protect workers, partners and visitors.	✓ Lost Time Injury (LTI) Frequency Rate ✓ Number of Fatalities ✓ Number of Injuries ✓ Employee Benefits and Wellness Initiatives	 
Corporate Governance, Compliance, Disclosures and Reporting	Our governance framework ensures ethical leadership, regulatory compliance and transparent reporting through clearly defined roles, oversight mechanisms and accountable decision-making.	✓ % of strategic decisions evaluated for ESG risks and opportunities ✓ % of vendor contracts screened for legal and ESG compliance	   
Economic Performance	We focus on resilient, high-occupancy industrial parks that generate long-term value through operational efficiency, responsible resource use and positive local economic impact.	✓ Year-on-year revenue growth (%) ✓ Average park occupancy (%) ✓ Cost savings from resource efficiency	 
Risk Management	We follow a structured risk management approach to proactively identify, assess and mitigate risks across projects and operations.	✓ % of risks with documented mitigation plans ✓ % of contractors and vendors assessed for risk and compliance	   
Ethics and Transparency	We uphold ethical conduct and transparency as core business values, ensuring integrity, accountability and fairness in all stakeholder interactions.	✓ Number of complaints received ✓ Complaint resolution time (days) ✓ % of employees trained on ethics	  

CONCLUSION: Our materiality assessment has set the foundation for a robust and focused ESG strategy. It reflects KSH INFRA's commitment to not only understanding but also effectively managing the social and environmental impacts that are most significant to our stakeholders and our success.

STAKEHOLDER ENGAGEMENT

BROADENING PERSPECTIVES

Stakeholder involvement is vital to enriching our ESG journey. Engaging with a diverse range of stakeholders - from investors to local communities, from suppliers to occupiers, and from NGOs to governmental bodies - broadens our perspectives. It allows us to consider multiple viewpoints and understand the real-world impact of our operations.

DRIVING INNOVATION

By involving stakeholders in our ESG strategy, we can drive innovation and find synergistic solutions to complex challenges. Stakeholders often bring fresh ideas and alternative approaches to the table, which can lead to more effective, implementable and sustainable ESG practices.

ENHANCING CREDIBILITY

Transparent stakeholder involvement also enhances the credibility of our ESG initiatives. It demonstrates our commitment to accountability and shows that we are listening and responsive to the concerns and aspirations of those affected by our business.

IDENTIFYING RISKS & OPPORTUNITIES

Stakeholders can help us identify emerging risks and opportunities more quickly. This proactive approach to ESG issues can improve our resilience and ability to observe the ‘unseen’, thereby adapting to changing social and environmental conditions.

STAKEHOLDER

STAKEHOLDER ENGAGEMENT

Stakeholders	Channels of Communication	Frequency	Value Proposition
1. KSH INFRA Employees	- Town halls - Satisfaction survey - Employee engagement activities - Communication meets - Notice board - Emails	- Quarterly - Annual - Annual - Whenever required - Updated whenever required - Regularly	- Nurturing work environment and career growth prospects - Diversity and equal opportunity - Health and wellbeing
2. Communities	Personal meet	Whenever required	To discuss the issues in the locality
3. Government Authorities	- MPCB consent - CTO - Labour Licence - PRMA / DTCP	- Before starting the project - After completion of the project - Before starting the project	Compliance to contract and state government rules and regulations
4. Board Members	Board meetings	Quarterly	Effective evaluation of governance for achieving business excellence
5. Clients / Occupiers	- Customer audits - Review meetings - Customer visits - Customer satisfaction index from - Technical data sheets - Customer quotes	- One in a three-year period - Whenever required - Whenever required - Yearly & at the times of job inspection - Each customer enquiry	- Product quality - Cost and competitive pricing - Customer satisfaction - Technical feasibility - Handover
6. Investors	- Project synopsis - Review meeting - Site visit - Technical specification sheet - MIS	- Monthly - Whenever required - Whenever required - Before starting the project	- Budget accuracy and financial status - Project risk and scope - Project quality
7. Contractors and Suppliers / Vendors	- Review meeting - Email - Pre-bids	- Weekly - Regularly	- Project progress schedule - Timely material and schedule
8. Consultants / Auditors	- Physical audit on site - Financial audit - Consultant visit	- Half yearly - Annual - Regularly	- Quality, safety and schedule - Compliance to Income Tax and Labour - Laws To discuss any issues related to projects
9. Workers	- Toolbox talk - Training and motivational program - Safety week celebration - Reward and recognition	- Daily morning - Monthly - Annual - Annual	- Raise awareness about health & safety - To discuss any issues related to work - To appreciate the exemplary job done and maintain team harmony & family-like bond
10.Banks / Lenders	- Project finance enquiry - KYCs & projections	Before starting the project	To maintain the faith of the project funding agency
11.Media	- Press releases and media briefings - Interviews - Corporate website and digital announcements - Social media updates and digital platforms - Industry publications, conferences, forums and public events	- As required, based on major project announcements and milestones - Periodic updates during key developments, recognitions, and ESG initiatives	- Provide timely, accurate, and credible information - Enable informed reporting on projects and sustainability - Strengthen public understanding of industrial infrastructure - Contribute constructively to industry dialogue on responsible growth

GOVERNANCE

STEERING GROWTH WITH INTEGRITY AND ACCOUNTABILITY

Strong governance forms the backbone of KSH INFRA's long-term strategy. As we continue to expand our Industrial and Logistics footprint, we remain guided by a philosophy that growth must be anchored in ethics, transparency and responsible decision-making. Our governance approach reflects the essence of Growing Together Responsibly ensuring that every project, partnership and policy is aligned with the highest standards of integrity.

HOW WE MEASURE

GOVERNANCE

A LEADERSHIP FRAMEWORK BUILT ON ETHICS AND RESPONSIBILITY

KSH INFRA is governed through a leadership framework that emphasises ethical conduct, operational discipline and long-term value creation. Strategic oversight is exercised through a clear governance structure that ensures accountability at every level, while day-to-day operations are guided by defined policies, controls and compliance mechanisms.

Our governance model maintains a clear separation between oversight and execution, enabling transparent decision-making, strong internal controls and effective risk management. All employees, contractors and partners are expected to align with our values, vision and ethical standards.

Our Board comprises members with diverse expertise in real estate, infrastructure, finance, strategy, and governance, enabling balanced and informed decision making.

Quarterly Board Meetings play a central role in governance, enabling active oversight of organisational performance, strategy, risk management, and adherence to regulatory and compliance requirements.

BOARD STRUCTURE

- **6 Directors** on the Board
- **5 members** in Executive Management
- **Joint Venture Directors** represented at the project level
- **50% female representation** on the Board
- **Board tenure** reviewed annually

The Board actively oversees project approvals, land acquisition compliance, environmental clearances, financing structures and long-term leasing arrangements to ensure alignment with regulatory and sustainability objectives.

Employees are required to disclose and seek prior approval for any external directorships to prevent conflicts of interest. External appointments during employment are permitted only with appropriate authorisation.

POLICIES

At KSH INFRA, we recognize the importance of policies as they offer guidance, consistency, compliance, risk management, employee direction, cultural reinforcement, and accountability, all of which contribute to the effective governance of the organization. Annual training is given to all the employees on the below mentioned policies.

Our policies :

They are revised periodically

Sustainability Policy	Work from Home Policy
POSH Policy	HR Manual / Policy
Travel & Reimbursements Policy	Child Labor Policy, Bonded Labor Policy
Code of Conduct (covering fraud, Anti-bribery, whistleblower)	Stakeholder Management Policy
Flexi Pay Policy	EHS Policy
Transfer Policy	Celebration Policy
Stakeholder Management Policy	Communication Policy

ANTI-BRIBERY & ANTI-CORRUPTION

We maintain a stringent commitment to anti-bribery and anti-corruption policies in our interactions with stakeholders, ensuring that all transactions are conducted with the utmost ethical standards and at arm's length. To date, there have been no reported incidents of such nature, reflecting our steadfast dedication to ethical conduct. We actively foster clear communication within our team by promoting information transparency. This ensures that all team members have access to relevant information, facilitating better collaboration and decision-making processes.

For KSH INFRA, working within applicable laws and regulations is not only a legal requirement but also a crucial aspect of business responsibility and sustainable business practices. Furthermore, there were no direct or indirect political contributions during the reporting period.

We are enhancing project reporting metrics and establishing new criteria to improve project monitoring effectiveness. The company is currently in the phase of identifying and incorporating an ERP system to improve data management, reporting, and monitoring capabilities.

ZERO cases

ZERO data breaches

SYSTEMS, MONITORING AND CONTINUOUS IMPROVEMENT

To strengthen governance effectiveness, KSH INFRA is enhancing its project reporting and monitoring capabilities. The organisation is in the process of identifying and implementing an ERP system to improve data management, reporting accuracy and performance tracking across projects.

GOVERNANCE FRAMEWORK

Our corporate governance is led by the Steering Committee which includes Board of Directors, our Managing Director and Chief Executive Officer. The ESG Committee reports to the Steering Committee along with our COO. ESG Committee oversees the strategic interventions. Our ESG head works closely with the COO and the ESG Committee ensuring effective implementation of ESG initiatives.

RESPONSIBILITIES

Our cross-functional leadership are responsible for the execution of ESG-related activities, ensuring that ESG principles are integrated into their specific functional roles as well.

1. Setting strategic priorities and performance expectations
2. Reviewing progress on business and ESG objectives
3. Providing direction on key risks, investments and operational matters
4. Ensuring accountability across leadership and functional teams

This framework is designed to ensure that ESG considerations are integrated into every level of our organization, from strategic planning to day-to-day operations.

We are in the process of setting up systems of regular evaluations of sustainability initiatives, performance indicators, and reporting mechanisms to ensure continuous improvement and accountability.

CODE OF CONDUCT AND ETHICAL STANDARDS

All employees, contractors and partners are expected to uphold our Code of Conduct, a foundational document that outlines expected behaviours, ethical responsibilities and principles related to transparency, conflict of interest, fairness and professionalism.

The Code is integrated into onboarding, contractor management and performance expectations, ensuring that ethical conduct is embedded throughout our value chain.

KEY PROVISIONS INCLUDE:

- Zero tolerance for bribery, corruption or unethical influence
- Mandatory disclosure of conflicts of interest
- Ethical handling of financial and procurement decisions
- Responsible interactions with customers, suppliers and communities
- Commitment to integrity in communication and reporting

Through training and regular reinforcement, we ensure that governance is not just a policy, it is a lived organisational value.

GOVERNANCE

Data Privacy, Confidentiality and Customer Protection

We uphold stringent systems to safeguard customer data and prevent unauthorised access or misuse. These responsibilities are enforced through internal controls, restricted access protocols and continuous oversight.

HIGHLIGHTS

ZERO

Customer privacy breaches

ZERO

Data loss incidents reported

This demonstrates our commitment to ethical stewardship of information and trust.

Governance in Construction: Safety, Quality and Contractor Oversight

Construction governance is a critical pillar in our operational model. All contractors operate under strict safety, labour and environmental expectations, ensuring responsible execution across project sites.

WE ENFORCE

- Mandatory training for contract workers (EHS, POSH, human rights)
- Clear safety protocols, toolbox talks and supervision structures
- Waste segregation, dust control and responsible disposal
- Adherence to C&D Waste Rules and statutory labour norms

Performance metrics such as 83,000+ toolbox talks, 1,500+ workers trained in and zero fatalities reflect the strength of governance in our construction operations.

Growing Together... Responsibly

SUPPLY CHAIN plays a major role

We actively promote the engagement of local vendors, particularly those from the district where we operate.

For our Chakan Park III & Park IV project, up-to

~75%

of the material was purchased from local Suppliers / Vendors.

Our Suppliers / Vendors need to sign off and adhere to our policies and Code of Conduct.

Transparent Grievance Redressal and Whistleblowing

KSH INFRA maintains a structured grievance redressal mechanism overseen by a dedicated committee. Employees, contractors and stakeholders can raise concerns confidentially and securely, with all submissions reviewed impartially and escalated to the highest governance body when required.

The email address for communicating any concerns: coc@kshinfra.com. Whistleblowing protections ensure that individuals can report issues without fear of retaliation, reinforcing our commitment to accountability and openness.

The Grievances Committee follows the procedure outlined in the Code Of Conduct (COC) policy and takes necessary disciplinary action.

Robust Environmental, Social and Operational Compliance

Governance extends across all operational aspects, construction, environmental management, labour practices, customer dealings and data protection.

OUR PROJECTS COMPLY WITH

- MoEFCC and State Pollution Control Board guidelines
- IGBC and EDGE certification frameworks
- Labour laws, statutory benefits and fair employment standards
- POSH regulations with 100 percent training compliance
- OH&S systems, including periodic audits and on-site inspections

These governance systems ensure that policy commitments translate into consistent on-ground performance.

GOVERNANCE

Anti-discrimination, Equity and Fair Practices

KSH INFRA promotes a workplace rooted in fairness and equal opportunity. Our policies reinforce non-discrimination, gender sensitivity and inclusive behaviour, ensuring that every individual in our ecosystem is treated with dignity.

HIGHLIGHTS

ZERO
cases of discrimination

ZERO
instances of child or forced labour

ZERO
trade union disputes or collective bargaining issues reported

Transparent, documented processes for hiring, transfer & remuneration

These outcomes demonstrate the consistency and integrity of our governance systems.

POLITICAL NEUTRALITY COMMITMENT

KSH INFRA maintains strict political neutrality. We do not make political contributions, support political parties, or engage in activities intended to influence public policy or elections. Our engagement with government bodies is limited to lawful, transparent, and ethical interactions aligned with regulatory compliance and responsible business practices.

Risk Management and Monitoring

Industrial and Logistics Park development involves long gestation projects, making risk management critical. We are strengthening our monitoring framework by: deploying an Enterprise Resource Planning (ERP) system for seamless project monitoring, documentation, and compliance tracking. Regularly assessing risks relating to regulatory changes, environmental requirements, and tenant obligations.

This integrated approach allows us to proactively address challenges while ensuring business continuity and accountability.

Introducing new evaluation metrics for project efficiency, lease management, and tenant satisfaction.

A Governance Structure Designed for Sustainable Growth

As KSH INFRA expands, governance remains central to our strategy. We continuously refine our policies, strengthen oversight, modernise systems and enhance compliance mechanisms to match our growing scale.

Our vision is to maintain a governance system that not only protects organisational integrity but also inspires trust among customers, communities, employees and partners. It is this trust that enables us to grow responsibly together.

ENVIRONMENTAL

A FOUNDATION BUILT ON ENVIRONMENTAL RESPECT

For KSH INFRA, environmental responsibility is not a box to be checked, but the foundation upon which every park is imagined, designed and delivered. Our developments stand in fast-growing industrial corridors, yet they are rooted in a philosophy that progress must always coexist with ecological care.

Growing Together Responsibly, for us, means building spaces that contribute positively to the landscapes they inhabit, strengthening natural systems while enabling world-class industrial growth. Our environmental approach is deliberate and continuous, shaped by the belief that every decision, from material selection to land planning, must reinforce our long-term vision of regenerative infrastructure.

HOW WE MEASURE

	Energy Efficiency	Energy Intensity (GJ/sq.ft.) Share of Renewable Energy (%) GHG Emissions Reduction (%)
	Water Efficiency	Water Intensity (KL/sq.ft.) Recycling & Reuse (%) Volume of Rainwater Harvested (KL)
	Site Selection	Connectivity & Strategic Access Score Land Suitability & Infrastructure Readiness Index
	Waste Management	Waste Intensity (MT/sq.ft.) Recycling & Reuse (%) Waste Segregation Efficiency (%)
	Sustainable Building Certification	% of total built-up area certified

ENVIRONMENTAL

GREEN CERTIFIED PARKS THAT REFLECT OUR VALUES

Our journey toward sustainable infrastructure is reflected in the certifications achieved across our parks. Chakan Park II, developed between 2019 and 2022, earned EDGE Certification after demonstrating significant reductions in energy use, water consumption and embodied carbon. Chakan Park III secured IGBC Platinum Pre-Certification, reinforcing our ability to deliver developments that exceed industry sustainability expectations.

These achievements were not accidental. They required early design alignment, meticulous coordination and thoughtful engineering, especially at a time when sourcing specialised sustainable materials posed global challenges. By overcoming procurement delays and design constraints, we reaffirmed our commitment to creating industrial ecosystems that stand as examples of responsible development.

Certification is not the goal, it is the outcome of our deep-rooted intent to create infrastructure that performs efficiently, operates responsibly and contributes meaningfully to its environment.

ENVIRONMENTAL PERFORMANCE THAT DEMONSTRATES REAL PROGRESS

The environmental benefits emerging from our certified parks highlight the tangible impact of integrating sustainability at every stage of project development.

Energy consumption has been reduced by more than 30% through insulated envelopes, efficient lighting strategies and optimised building orientation. The embodied energy of our material choices has dropped by more than 65% demonstrating our commitment to low-impact construction practices. Water consumption has reduced by more than 55% owing to conservation technologies, recycling systems and climate-appropriate landscaping.

BUILDINGS EDGE CERTIFIED 5	TOTAL EDGE CERTIFIED AREA 1.20 MN SQ.FT.
BUILDINGS IGBC PRE CERTIFIED 10	TOTAL IGBC PRE CERTIFIED AREA 1.86 MN SQ.FT.

Note - Consolidated information

ENERGY

DESIGNING ENERGY-SMART PARKS FOR A LOW-CARBON FUTURE

Energy efficiency sits at the heart of climate-responsive industrial infrastructure. At KSH INFRA, we strive to lower operational energy loads not only for compliance but to offer long-term economic and environmental value to the businesses that operate within our Parks.

KSH INFRA continues to improve energy performance across its Industrial and Logistics Parks through a combination of efficient design, responsible consumption practices, and gradual integration of renewable energy.

191.72 GJ Total Energy Consumption

Our total energy consumption includes fuel and electricity consumed at our offices and project sites during the reporting period.

HOW WE DO IT

Use high-performance building envelopes, daylight-led lighting and efficient HVAC systems to reduce energy demand

Select materials and construction methods that lower embodied energy and minimise waste

Design buildings with solar-ready infrastructure to enable future renewable integration

Promote electric vehicles and public transportation

Provide bicycle and walking infrastructure

Promote use of alternative fuels

Track energy performance to support continuous improvement and transparent reporting

>30%	ENERGY SAVINGS
WATER SAVINGS	>55%
>65%	LESS EMBODIED ENERGY USED

Consolidated estimated savings achieved over conventional baseline design

Note - Data reported has limited information, we are establishing the process of capturing required relevant information.

ENVIRONMENTAL

EMISSION

Managing emissions during construction is a key priority for reducing climate impact and protecting public health. In addition, we recognise the importance of addressing emissions across our value chain.

Scope 2	22.76 tCO2
Scope 3	5790.16 tCO2

- ¹**Scope 1** emissions are not reported as the Company operates from leased premises and does not have operational control over fuel-combusting equipment.
- ²**Scope 2** emissions arising from purchased electricity
- ³**Scope 3** During the report period, we initiated a structured process to capture and analyse Scope 3 emissions, establishing baseline to support future reduction planning.

- Following Categories:**
- Cat 1. Purchased goods and services
 - Cat 3. Fuel and energy-related activities not included in Scope 1 and Scope 2
 - Cat 5. Waste generated in operations
 - Cat 6. Business travel
 - Cat 7. Employee commute

- REDUCTION INITIATIVES**
- Preference for local procurement to reduce transportation-related emissions and associated carbon intensity.

Stewarding Water as a Shared Resource

Water stewardship is a defining element of our environmental philosophy. Our developments are designed to reduce dependency on freshwater sources by embedding conservation practices into the core of infrastructure planning.

9,672	KL Water withdrawal
7,400	KL Water recycled and reused for landscaping and domestic purposes
~1, 416	KL Rainwater harvested

- HOW WE DO IT**
- Rainwater harvesting
 - Water efficient plumbing fixtures
 - Water metering
 - Waste Water Treatment and Reuse for landscaping and native green cover

As we continue to scale, we remain committed to adopting circular water practices that respect local water realities and reinforce long-term resilience.

Nurturing Biodiversity Within Industrial Landscapes

Our industrial parks are not only centres of economic activity; they are evolving ecological spaces. We have planted ~5,500 native trees across park edges, roadways and open lands, creating green corridors that support pollinators, enhance air quality and stabilise microclimatic conditions.

Landscape design across our developments intentionally incorporates regional species that thrive in local conditions, reducing irrigation needs and fostering natural diversity. Through soil regeneration and thoughtful planting, we continue to elevate the ecological value of our sites and reinforce the connection between thriving industry and thriving ecosystems.

Note - Data reported has limited information, we are establishing the process of capturing required relevant information.

ENVIRONMENTAL

Waste Management : Circularity at the Core of Construction

In the construction industry, responsible waste management is essential to limiting environmental impact and maintaining safe, compliant project sites.

For KSH INFRA, this means ensuring that construction debris, packaging, and material wastes are handled in a controlled and responsible manner.

6 MT	Waste generated
ZERO	Waste to Landfill (Steel, Paper, Cardboard and Wooden Scrap)

Our construction practices prioritise segregation at source, recycling of recoverable materials, responsible disposal of hazardous streams and close oversight of contractor compliance. One of the most impactful practices has been the reuse of excavated soil. More than 40,000 MT of earth has been repurposed for agricultural use, significantly reducing transport needs and landfill pressure.

This approach reflects our commitment to responsible resource use and our belief that materials should retain value for as long as possible within our development ecosystem.

- HOW WE DO IT**
- Begin waste minimisation at the design stage
 - Plan material use carefully, standardise components, and optimise layouts to reduce excess consumption before construction begins
 - Apply thoughtful engineering, efficient procurement, and precision-led execution to limit debris, avoid rework, and ensure responsible resource use
 - Strengthen sustainability performance, improve site efficiency, and support cleaner, more resilient project delivery through a design-first approach

A RESPONSIBLE PATH FORWARD

As KSH INFRA grows, so does our responsibility to the environment. Our long-term plan focuses on expanding renewable energy readiness, reducing dependency on freshwater, strengthening circularity in materials, increasing green cover and adopting higher sustainability standards across all future parks.

Our vision is to create industrial ecosystems that positively influence their surroundings while enabling businesses to flourish. In doing so, we aim to continue Growing Together Responsibly with every community, partner and tenant we serve.

Choosing Materials That Minimise Environmental Burden

Materials shape both the character and the carbon footprint of a building. Across our developments, we prioritise options that reduce embodied emissions while enhancing performance and longevity. We use blended cements with lower embodied carbon, recycled steel elements, high-reflectance roofing materials and low-VOC interior finishes. Pre-engineered systems reduce waste generation, while high-performance materials help maintain overall efficiency during operational life. Across our parks, more than 32000 sq m of sustainable material applications have already contributed to meaningful reductions in embodied energy. These choices align with our intent to construct resilient and responsible industrial assets that age well both environmentally and operationally.

Our main materials used for the reporting year : Steel (394 Tons), Cement (2,946 Tons), Sand (3,241 Tons) and Aggregate (4,655 Tons).
Going forward, we intend to increase the percentage of recycled materials used at our sites.

- REDUCTION INITIATIVES**
- I Replacing cement with Fly Ash (10% cement replaced)
 - I 100% Clay red bricks replaced by Fly Ash bricks
 - I Excavated stone reused for internal road construction
 - I 815 Tons of PEB steel used to enable efficient design, reduced waste and customisation

SOCIAL

GROWING WITH PEOPLE, UPLIFTING COMMUNITIES

At KSH INFRA, growth is meaningful only when people grow with us. Our social philosophy is built on respect, well-being, empowerment and safety, ensuring that every individual in our ecosystem, whether an employee, contractor, partner, customer or community member, thrives as part of our journey. The essence of Growing Together Responsibly shapes how we nurture talent, support communities, uphold human rights and create workplaces grounded in dignity and opportunity.

HOW WE MEASURE

SOCIAL

ABOUT EMPLOYEES

Employees are the backbone of any organization, playing a pivotal role in its success. They are instrumental in driving productivity, innovation, and growth. Additionally, employees are the face of the company, representing its values and culture to customers and stakeholders. Investing in their development, well-being, and engagement is crucial towards promoting a positive work environment and achieving organizational objectives. We understand that recognizing the importance of employees leads to higher morale, retention, and dedication towards work. We have 32 employees on payroll while an additional 29 are on contract. Our attrition rate stands at <2%. For every project, 10 people are added per Mn. sq. ft.

RESPECT AND CARE FOR ALL OUR WORKFORCE

KSH INFRA recognizes that the strength of our organization lies in the collective contributions of every individual who supports our operations. Beyond our core team, we value the essential roles played by housekeeping staff, security personnel, pantry teams and other support workers who make our parks safe, clean and welcoming. We comply fully with labour standards, fair remuneration norms and statutory requirements. All employees, including support staff, have equal access to amenities, safe working conditions and respectful work environments. Regular interactions, appreciation initiatives and open communication help build a culture where every voice is valued and every role is honoured.

HIGHLIGHTS

EMPLOYEE NUMBERS

SKILLING AND DEVELOPMENT

Continuous learning is essential for enabling our people to thrive in a rapidly evolving industry.

At KSH INFRA, every employee is empowered through structured training, coaching and capability-building initiatives.

Training covers ESG, health & safety, environmental awareness, POSH, tax planning, digital systems (Beehive HRMS), financial processes (Paysquare) and more.

Contract workers receive specialised training during Safety & Quality Week, ensuring an inclusive and comprehensive skilling ecosystem.

UPHOLDING DIVERSITY, EQUALITY AND FAIR EMPLOYMENT

We are committed to creating a work culture rooted in equal opportunity. Our workforce includes 25% women, reflecting significant improvement from previous years. While we currently do not have differently abled employees, our inclusive policies ensure readiness to support diverse talent pools.

Women representation increased from 10% to 25%

(Permanent employees)

ZERO instances of discrimination were reported

HIGHLIGHTS

100% staff were given training

Average training hours: **20** hours per employee

Management coaching and cross-functional team-building initiatives implemented

Strengthened capabilities for safety, compliance, digital adoption and sustainability

ZERO Sexual harassment cases reported

100% employee participation in POSH training

SOCIAL

EMPLOYMENT PRACTICES

We provide Medclaim, Accident and Retirement Benefits to all our permanent staff. Our Notice period is 3 months across a large part of our employees. We are paying well beyond local minimum wages to our permanent and temporary workforce.

FLEXI PAY POLICY	TRANSFER POLICY	WORK FROM HOME POLICY	CELEBRATION POLICY	COMMUNICATION POLICY
------------------	-----------------	-----------------------	--------------------	----------------------

All permanent employees on the Company's payroll are not covered under any collective bargaining agreements or represented by trade unions.

WELL-BEING

To promote employee well-being, we organize structured outings, team-building exercises and sports activities. These events are designed to foster camaraderie, enhance communication, and strengthen bonds among team members, ultimately contributing to a positive work environment.

REWARDS AND RECOGNITION PROGRAM

This is a key platform to acknowledge and celebrate employee contributions across the organization. As part of the program, teams from every department presented their annual performance recaps, highlighting key achievements, learnings, and collective impact over the year. The purpose of rewarding employees is to ignite motivation and drive performance improvement consistently. By regularly recognizing employees who are performance driven, we foster teamwork, enhance organizational value, and cultivate a positive culture.

When I walk into a well-managed site, I personally feel calmer and more focused, and I see the same confidence reflect in the team around me.

Suraj Shah
Assistant General Manager, KSH INFRA

Recognizing the significance of engaging the local community in our projects, we do prioritize providing more job opportunities to the local population, additionally without any discrimination of gender or caste. This initiative commenced with the inception of KSH INFRA's first park construction in Chakan and continues to be an ongoing commitment.

We are strictly against employing of child labor or forced labor. We have implemented stringent policies and procedures to ensure compliance with this principle. Additionally, there have been no reported incidents of discrimination or instances of collective bargaining at our project sites. It is important to note that there are no trade unions established at our project sites.

We ensure that our Security personnel are trained on Organization's policies and procedures concerning aspects of human rights, POSH Policy, Code of Conduct etc.

HEALTH AND SAFETY

At KSH INFRA, our dedication to environmental and occupational health and safety (EHS/OH&S) is unwavering across all our operations, products, and services. We continuously improve our EHS and OH&S systems through risk analysis, aiming to prevent incidents and reduce pollution. We comply with all relevant standards and strive to eliminate hazards, reduce risks, and meet compliance obligations. Our operations are governed by an integrated, structured, and documented management control system, with active participation from all stakeholders, including workers.

HEALTH AND SAFETY IN CONSTRUCTION

More than **1,500** people including our staff and contractors have been trained on EHS topics during our Chakan II project.

ZERO Fatalities
46 First Aid cases

4,385 Tool box talks
Toolbox talks are informal group discussions centered around safety issues. They are conducted daily to foster a culture of safety within departments and initiate conversations about health and safety on job sites.

HSE INSPECTION

Health, Safety, and Environment

We regularly monitor progress and review the checklist at specified intervals. Additionally, every six months, a certified external auditor conducts a comprehensive audit of all aspects.

HSE PRACTICES

Pre-construction stage

Hazard identification and risk assessment
Vendor evaluation on HSE parameters
HSE manual
HSE resource and infrastructure planning
HSE visuals like posters, training materials
Statutory compliances
Kick-off meeting to explain HSE expectation to all

Construction stage

HSE trainings to all employees and workers.
Inspection and tagging of equipment, tools and machinery
Medical check-ups for the workers
Formation of Safety Committee and regular meetings
Weekly safety walk, to identify the safety lag and corrective action
Construction phase monitoring audit and third party HSE audit
• Work permit system • Monitoring of the statutory compliance
• Conducting mock-drills • Monitoring of labor colony set-up
• Motivational programmed for workmen/ employee
• Management review • Safety performance awards for contractors

Post-construction stage

Building handover to Facility Management (FM) teams
HSE training on operational aspects
Green Certification (EDGE/IGBC)
Conducting operation monitoring audit
Management reviews

To strengthen safety awareness and build a proactive safety culture, KSH INFRA conducts regular health and safety training programmes for both employees and contractors.

These programmes focus on identifying workplace risks, promoting safe work practices, and ensuring preparedness to respond effectively to emergencies.

Key training topics include

- Hazard identification and risk assessment
- Electrical safety
- Excavation safety
- Personal Protective Equipment (PPE) management
- Behaviour-based safety programmes
- Construction safety practices
- Hot work safety
- Working at height
- Manual material handling
- Work permit systems
- Occupational health and well-being
- Stress management
- Road safety and defensive driving techniques
- HIV and AIDS awareness
- Office safety and ergonomics
- Emergency preparedness and response
- First aid and fire-fighting

Our Hazard Identification and Risk Assessment (HIRA) policy covers a comprehensive range of work-related activities. Through this framework, potential hazards are systematically identified, risks are assessed based on likelihood and severity, and appropriate control measures are implemented to reduce risks to acceptable levels or eliminate them wherever possible.

To ensure prompt response during emergencies, we maintain dedicated emergency vehicles and provide first-aid kits across key locations on site, proportionate to workforce size. In the event of a medical emergency, employees are transported promptly to nearby hospitals and clinics with which we maintain established tie-ups.

Promotion of worker health

During Induction detailed examinations is carried out. Followed by weekly on-site doctor visit. Vaccination drives are organized as needed Tetanus Toxoid (TT) shots are given once a year.

GROWING ROOTS WHERE WE BUILD

KSH INFRA's growth is inseparable from the growth of the communities that surround our Parks. Our approach to community development is shaped by a simple belief that progress is meaningful only when everyone moves forward together. Guided by Growing Together Responsibly, we focus on long-term, inclusive initiatives that strengthen local economies, support social welfare and create opportunities for individuals and families across our project locations.

WHAT DO WE TRACK KPIs

% of contractors/vendors sourced locally

Number of community welfare initiatives conducted annually

We are continuing our efforts to give back to society / community by partnering with Mudita – An Alliance for Giving, a public charitable trust.

COMMUNITY INTEGRATION THROUGH ETHICAL CONSTRUCTION PRACTICES

ENABLING LOCAL LIVELIHOODS AND ECONOMIC PARTICIPATION

From the very first park in Chakan, KSH INFRA adopted a community-first employment philosophy. Local hiring has not been an afterthought but a consistent and deliberate strategy to ensure that economic opportunities remain within the region we operate in. This includes skilled, semi-skilled and support roles, and extends into leadership positions as well.

This approach not only contributes to local economic growth but also deepens our roots in the community, fostering trust, familiarity and long-term partnership. Local employees bring valuable contextual understanding and become essential champions of our purpose, culture and values.

HIGHLIGHTS

Hiring local population initiated from first Park construction and ongoing as a core commitment

STRENGTHENING HUMAN RIGHTS AND COMMUNITY SAFEGUARDS

Our responsibility to the community extends beyond job creation. It includes ensuring a safe, ethical and respectful environment for everyone who interacts with our projects. KSH INFRA maintains strict safeguards that protect vulnerable groups, uphold fundamental rights and ensure fair treatment across the value chain.

We follow a zero-tolerance approach to child labour, forced labour, discrimination and unsafe working conditions. Our security staff receive structured training on human rights, POSH, and Code of Conduct frameworks to ensure community-facing touchpoints remain respectful and sensitive.

HIGHLIGHTS

Strict policies against use of child labour or forced labour; **zero cases reported**

Security personnel trained on human rights, POSH and Code of Conduct

These initiatives strengthen community resilience and create pathways for long-term socio-economic transformation.

COMMUNITY WELL-BEING THROUGH SOCIAL IMPACT INITIATIVES

We recognise that meaningful community development goes beyond employment, requiring tangible investments in social upliftment. KSH INFRA supports targeted initiatives that address food security, education and dignity for underserved groups through strategic partnerships.

One of our most impactful contributions is through our engagement with Mudita – An Alliance for Giving, a public charitable trust. Our annual contributions enable programs that support elderly women, underprivileged students and vulnerable families through direct financial support, food essentials and education sponsorships.

College Scholarships enable underprivileged students to pursue higher education, with several alumni progressing to successful careers including merchant navy professionals, art facilitators and doctoral researchers.

~30 Students were given scholarships in FY'25.

Annadaan Program supports senior citizens in slums without any family support with monthly food kits essentials, ensuring dignity and nutritional security.

The kits consists of nutritionally dense staples like pulses, rice, jaggery, peanuts were distributed in the last two years. Each kit provides food supply for a month.

>3,600* Beneficiaries

As part of our social initiative, we undertook the development and beautification of an arch at MIDC Chakan Phase II, obtained from MIDC. The concrete structure has been enhanced with plastering, painting, and branding, in line with MIDC guidelines. The branding includes the MIDC logo, KSH Group logo, and directional markings.

A PHILOSOPHY OF SHARED PROGRESS

Our community philosophy is simple; we want every neighbourhood that hosts our Parks to feel the benefit of our presence. Whether through economic opportunities, environmental stewardship or social upliftment, we contribute to building stronger and more resilient local ecosystems.

As we continue to expand, we aim to deepen our community partnerships, widen the reach of social development programs and ensure that every project we deliver leaves behind a positive and lasting impact.

*Consolidated Information

CLIENTS

GROWING PARTNERSHIPS THAT SHAPE THE FUTURE

At KSH INFRA, our clients are at the centre of every decision we make. In line with our philosophy of Growing Together Responsibly, we work as long-term partners rather than service providers, co-creating sustainable, efficient and future-ready industrial and logistics ecosystems. Our clients trust us not only for the quality of our parks but also for the reliability, transparency and integrity with which we operate.

BUILDING TRUSTED, LONG-TERM PARTNERSHIPS

Our Industrial and Logistics Parks host a diverse portfolio of multinational companies across automotive, Automobile ancillaries, logistics, FMCG, energy, paper and high-performance manufacturing sectors. Each partnership is rooted in a deep understanding of customer expectations, operational needs and sustainability alignment.

Instead of offering one-size-fits-all solutions, we focus on designing infrastructure that enables businesses to thrive, ensuring operational efficiency, compliance, safety and long-term scalability. Customers value our ability to deliver high-quality, sustainable assets backed by strong governance and a responsive service model.

RELIABILITY, PRIVACY AND RESPONSIBLE DATA HANDLING

ZERO Complaints concerning breaches of customer privacy and losses of customer data

Trust is the foundation of customer relationships. We maintain strong systems, oversight mechanisms and governance processes to ensure operational stability, transparency and security across assets.

Our policies uphold the protection of customer data and safeguard confidential information. KSH INFRA has recorded zero instances of customer data breaches and privacy violations, demonstrating our commitment to responsible data stewardship.

CLIENT-CENTRIC DESIGN AND INFRASTRUCTURE EXCELLENCE

Every KSH INFRA Park is engineered to support seamless operations for our clients. Our design philosophy integrates sustainability, safety and functionality ensuring that buildings perform efficiently throughout their lifecycle.

We adopt best-in-class construction practices, maintain rigorous QA/QC processes and incorporate green design principles from the planning stage. This approach not only helps customers meet their own ESG goals but also lowers operational costs, enhances resilience and supports global compliance requirements.

Our Buy-Build-Lease-Exit model ensures that every project delivers enduring value to tenants and investors alike.

SUPPORTING CUSTOMER GROWTH THROUGH SUSTAINABLE SOLUTIONS

As global supply chains evolve, customers increasingly prioritise sustainability, compliance and resilience. KSH INFRA's Parks are designed to support these emerging needs by:

Integrating EDGE and IGBC-certified sustainability features

Embedding energy and water efficiency

Providing safe, compliant, and environmentally responsible infrastructure

Offering scalable spaces that allow customers to expand seamlessly

By future-proofing our Parks, we enable customers to reduce their environmental footprint, streamline operations and meet both regulatory and internal sustainability requirements.

COMMUNICATING OUR COMMITMENTS WITH HONESTY AND CLARITY

Marketing and brand communication at KSH INFRA are treated as governed functions, ensuring that all external representations of our Parks and services are factual, accurate and aligned with our values. The Leasing & Marketing function is included within our governance structure, reinforcing its responsibility to maintain transparency and uphold the ethical standards outlined in our Code of Conduct.

Our customer-facing communication highlights achievements such as the EDGE Certification of Chakan Park II and the IGBC Platinum Pre-Certification of Chakan Park III exactly as they are verified, credible accomplishments that reflect the sustainability features embedded in our developments.

We avoid overstated claims and ensure that all information presented in brochures, proposals and leasing materials is consistent with approved technical and ESG data.

Our governance performance further strengthens customer trust. During the reporting period, there were zero cases of customer privacy breaches and no incidents of data loss, demonstrating the effectiveness of our internal controls and responsible data handling practices.

By ensuring accuracy, consistency and ethical conduct in all marketing activities, we reinforce the credibility of our brand and uphold our commitment to growing responsibly with our stakeholders.

A SHARED JOURNEY TOWARD RESPONSIBLE GROWTH

Our relationship with customers goes beyond construction and leasing. We see ourselves as partners in their long-term success supporting business continuity, providing transparent communication, and ensuring that our infrastructure evolves with changing industry needs.

As we continue to develop new parks, we remain committed to embedding customer insights into our planning, strengthening service excellence and delivering infrastructure that empowers global companies to operate responsibly and competitively in India.
