DRIVING TRANSFORMATION IN INDIA'S INDUSTRIAL SUPPLY CHAIN

We have over the past 5 years played an active role in transforming the logistics and industrial landscape in Pune region, having a portfolio of 3 million square feet in industrial hubs like Chakan & Talegaon under various stages of development.

We have created a modern A-Grade infrastructure and given our multinational clients the option of moving into Ready Built Factories / Warehouses, or a Built-to-Suit (BTS) facility technically designed to cater to their specific requirements.

Having an in-house design and execution team, with extensive domain knowledge, our gamut of services range from designing MEP, HVAC, Fire, Sewage Treatment Plants, Effluent Treatment Plants, Cold Rooms, Labs, etc.

We as a team have over the years built world class infrastructure and gained the support of some of the leading investors from across the globe such as the Pacific Century Group of HK and Morgan Stanley Real Estate Fund of USA.

A GROWING NETWORK OF
WORLD CLASS INDUSTRIAL FACILITIES

KSH Infra has created several industrial parks across Pune’s industrial hubs with many more planned across other cities as well.

MAHARASHTRA
PUNE

- TALEGAON PARK 1
- TALEGAON PARK 2
- CHAKAN PARK 1
- CHAKAN PARK 2

“Team KSH has provided us a world-class facility in Chakan industrial area for our manufacturing operations. Team KSH was extremely supportive and professional in developing the facility for us. We were able to commence operations within two months from moving-in which was very beneficial for us.”

NAOKI MATSUMOTO
Chairman India, Kawasaki Motors

“KSH has been very instrumental during our facility setup and with their expertise in construction and understanding of our manufacturing needs, their collaborative approach allowed them to capture critical requirements to deliver our factory on time.”

TODD RENNER
Global Business Unit Manager, Jabil

KSH INFRA
DESIGN-TO-DELIVERY METHODOLOGY

PRE-PROJECT MANAGEMENT

- Preliminary survey and site assessment
- Preliminary planning
- Technology assessment
- Feasibility study and project report

PROJECT MANAGEMENT

- Project planning, scheduling & control
- Budgetary and cost control
- Intra-team communication management
- Safety management
- Liaison with statutory authorities

INSPECTION & EXPEDITING

- Vendor appraisal
- Stage-wise inspection
- Final inspection
- Expediting deliveries

COMMISSIONING SUPPORT

- As-built documentation
- Training of owner's personnel
- Troubleshooting

LEADING COMPANIES ACROSS

ZONA TALEGAON

Talegaon is an upcoming industrial and warehousing neighborhood in Pune. With close proximity to Chakan, the region is home to some of the largest engineering companies such as JCB, General Motors, L&T, POSCO, Emerson, PERI, Continental; the location has attracted engineering talent in abundance. A healthy diaspora of talented individuals from across India and from far corners of the globe, makes Talegaon a preferred destination for auto makers and other diverse industries alike. The region has a close proximity to the Port of JNPT in Mumbai, and is within striking distance of Mumbai Metropolitan Region.

MIDC (Maharashtra Industrial Development Corporation) has large plans for the region, and the total development planned in the area will exceed 10,000 acres when fully completed. Talegaon will emerge as the leading warehousing destination in the country due to its proximity to all major highways connecting the State of Maharashtra.

LOCATION ADVANTAGE

KSH Parks are located in close proximity to the industrial belt of Pune, Pimpri-Chinchwad, Chakan and Ranjangaon.

Chakan MIDC	11 Km
PCMC Industrial Area	15 Km
Mumbai-Pune Expressway	14 Km
Pune City	30 Km
Pune Airport	40 Km
Navi Mumbai	100 Km
JNPT Sea Port	100 Km

TO CATER TO EVERY DETAIL THAT YOU DESIRE

TECHNICAL SPECIFICATIONS

STRUCTURE

Building Type
Height at eave
Internal column spacing
End bay spacing
Roof slope
Roof sheeting
Side cladding
Natural lighting
Canopy cover
Roof access
Plinth height
Office type

Pre-Engineered Building from Zamil STEEL Buildings
8.5m clear height from FFL
Building 1- 8m x 20m | Building 2- 8m x 24m
8m
1 : 10 as per design
Bare galvalume standing seam roofing system to prevent leakages
Colour coated galvalume sheeting above brick wall
Polycarbonate sheets comprising 3% of the roof area with safety guard for roof protection
8m wide running canopy all along
Cage ladders provided for roof access and maintenance
1.3m from finished road level
External office block/blocks with glass facade and aluminum composite paneling comprising 2 floors provided for every building
5 to 8 ton/sq.m. TREMIX VDF (Vacuum Dewatered Flooring) with anti-termite treatment
Internal single side docking stations available
30m wide docking apron available
Motorised rolling shutters
6 to 8 air changes as per design with the help of a ridge monitor at the roof
Provision for 1 person every 1000 sq.ft. and provided within the building for workers

FIRE-FIGHTING SYSTEM

Internal
External
Alarm systems

Sprinkler based system with hose reels and fire extinguishers as per NBC norms
Fire hydrant system with hydrant posts connected to the pump-room and fire reservoir tank
Smoke detectors for the office block and beam detectors for the factory building

ELECTRICALS

Internal
External
Power

150 lux LED lights provided for the building
15 lux LED street lights provided on the internal roads
Varies from client to client and to be provided as per detailed client requirement

PARK INFRASTRUCTURE

ROADS

18m wide bitumen roads for easy maneuverability of trucks

ENTRANCE GATES

Manually operated gates for entry and exit of park with security block

SUSTAINABILITY

Rainwater harvesting
Landscaping in common areas
Recycling of water using STP

SECURITY FENCING

Compound wall with fencing along the park perimeter

DG BACKUP

100% back-up for external lighting and common services

WATER & SANITARY SYSTEM

Storm water drains throughout the park to avoid flooding
STP of suitable capacity to cater to the park
Underground water tanks with pipelines to each building
